

Trip to Egypt

Carl went to Egypt to attend a conference about UFO's. He had wanted me to accompany him, but I could not get time off from school. He met quite a few interesting people there at the conference. However, his most profound experience occurred when he visited the great pyramid at Giza.

Carl told me that he and the group toured the pyramid. They not only went to it but also went into it. Carl said that when he was in the King's chamber of the pyramid, Awan met him there to explain the true significance of the pyramids.

Awan said that the word pyramid means fire in the middle, and the ancient ones who designed and engineered the building of the pyramid, built a great truth into the structure. Furthermore, slaves did not build the pyramid, but by enlightened masters, who used the power of their minds to increase the frequency of the large blocks of stone. The molecules of the stones were now traveling so fast that the force of gravity no longer had any effect upon the stones. This meant that the stones were like large blocks of styrofoam, and could easily be put into place. Then the masters would allow the frequency of the stone to return to its natural frequency.

The blocks of stone were cut by laser light, and it was as if these stones were butter and a hot knife were being cutting through them.

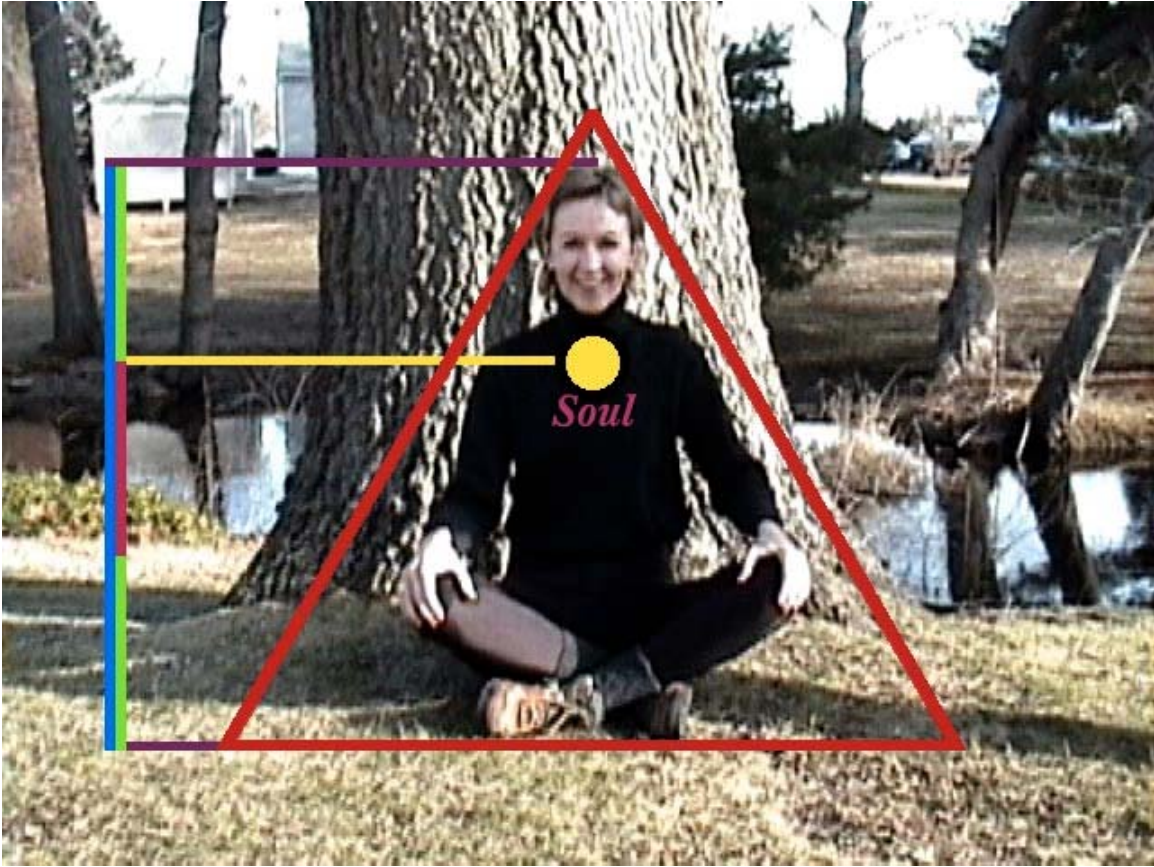

The great message of the pyramid was based in its shape and the position of the king's chamber. If one measured from the top of the pyramid, the king's chamber was located exactly $1/3$ of the way down, or $2/3$ from the base. If a human being sat on the ground in a lotus position, the soul is located exactly $1/3$ of the way down, or $2/3$ from the base.

The great pyramid of Giza was to be a monument for all time, reminding people of the location of their souls. Why was this so important? The great teacher, Joshua ben Jospheh, who you know as Jesus of Nazareth, taught that the kingdom of God is within.

The soul is your God. The soul is divine energy. If a person directs his thoughts inward (or his prayers inward) to his soul, his god, or her goddess, the soul will carry out this desires and wishes. The ancients wanted humanity to always know this, and this is why the pyramids were created.

Trip to Egypt

Here is a picture of Nancy, sitting in a Lotus position. Her soul is one third of the way from the top of her head and two-thirds up from her base, just as the Kings chamber in the Great pyramid.
