

MEDITATION IS ABSOLUTELY ESSENTIAL TO MANKIND

As you arrive, don't chatter and gossip. Go into the seance room. As one starts in a group meditation, something will begin to happen. Send out thoughts for development. Your Psychic Power will start to grow.

Through meditation in depth of silence, we would rise to greater wisdom and spirituality. Into the vast universe of truth we would send our spirits to be bathed in the purifying currents of love, that we may live the life for which we yearn and toward which our souls aspire. We would be made strong by the inflowing of God's love; we would patiently endure whatever falls to our lot, knowing that the path of rectitude leads up and out to glorious beauty, freedom and light.

We would not selfishly strive to achieve nor shirk the labor fraught with pain and suffering. With the strong arms of faith and tenderness, we would help all the spirits that reach out to us for help and strength.

MAN'S DUTY ON EARTH

The whole duty of man in this mortal life consists in taking the first steps in the attainment of knowledge and in gradually developing his character and nature to harmonize with the fully unfolded spiritual state. This duty compasses the entire conduct of man; mentally, morally, and spiritually.

The platform of Spiritualism is free. Every church and every religion in reality stands upon it. It is a movement that this world cannot keep back or move forward. No man or body of men can control it or slow down its growth. As it advances, you begin to see its working for good.

Spiritualism has started its spontaneous burst forth in members of every sect of religion on the earth. Here and there, one and more in every church, and in every organization of men, is found to be a spiritualist.

Faith in God is the acceptance in his ways and all his workings in the present and future. The Spirit world is really open. Spirits ascend and descend making contact and helping through guidance by thought impression. Spirit influences are in close and daily operation with all of us.

The spirit communication is no new thing. Men have always dwelt, more or less, in the spirit world, surrounded by spirits' influence, every man and every spirit upon a corresponding plane. No man acts an act, does a deed, or thinks a thought, except by impression, and the character of his act, deed, and thought is the most reliable description of the character of his impression.
