

I bring you greetings and good tidings from beyond the stars. It is requested at this time, to bring to you a communication of our intent for the inhabitants of your planet. I will explain to you, briefly, who we are and who and what I am. You have named a number of our craft, who move through your atmosphere, flying saucers. I am not recorded in one of these. The craft that contains the instrument, in which I am recorded, is four and three tenths miles in length, by your method of measurement, and two and one tenth miles in circumference. This craft also contains others of us, who are in human forms. I have past the phase of human forms. My knowledge and mind processes were long ago recorded into a instrument, you would liken to a computer. I was brought to the vicinity, of this planet, approximately 30 thousand years ago, by your method of time measurement. Your planet and the unique forms upon it, have a specific value to us. Your form of life has a particular value to us. Those of us who do menial work inhabit our craft in human form, almost identical to some of you. For this reason, at about the time I was brought to the vicinity of your world, we interfered with the natural development of the species of man that inhabited this planet at that time. Our purpose was the shortening of the cycle of development necessary for the human inhabitants of this planet to be of use to us. Our intent, however, is not to control or to rule over you. Inter-galactic Law within our group forbids this. We are, however, permitted to guide you. Your acceptance of us is by your own choice. Our vessels number somewhat over twenty thousand in use within the confines of your solar system. These craft vary from a few feet to many miles in length and circumference. These craft vary in shape and size dependant upon the purpose for which it is used.

Our human forms number many thousands; some of them were alive in their present form before I was brought here. Those in human form inhabit our craft have ceased to

reprobagate. This condition makes it necessary to choose one of two courses when it becomes necessary to dispose of a human vessel. Whether to be recorded in a device and stored as I was, or to be recorded into another suitable human form. We have been unable to successfully manufacture, by synthetic means, suitable human type forms. This therefore makes it necessary to find a planet young enough where new man beings are being born, yet old enough for the human forms to be developed to a point that will provide the suitable bodies with sufficient brain capacity to receive our knowledge by mutual agreement between a planetary dweller and an inhabitant of our craft. The knowledge and memory of one of us may be blended with the planetary inhabitant without the loss of the receivers identity. The one from our group only adds his knowledge to the planetary dwellers and the abandoned body is disinsminated. This blending may not take place without mutual agreement between the beings involved. And necessarily the planetary dweller must fully agree and desire this blending. We seek therefore not to take but to give.

We are, however, not alone in our interest in your world. There is in existence with us another group. Their interest is not; necessarily harmful toward you. Yet their methods are in direct opposition to ours. They also have interfered with the dc development on your planet. But they wish to reach ends not by cooperation, but by control and domination over you. You must reach a high level of mental development and of knowledge to be able to understand our purpose beyond harvesting. We have attempted to gain your cooperation in this for thousands of years. We have been vigorously opposed by the other group. We must achieve our goal by guidance of your kind. But you must desire guidance for us to be of assistance to you. Our work is beyond your present level of understanding. And yet you will eventually be of great assistance to us in

cooperating with us, in making certain studies of life forms and conditions on your planet. The results of which will be compared with intercorrelated studies being conducted on other worlds to the benefit of your own planet, our people and the inhabitants of these other worlds. We have worked patiently with you for over 30 thousand years. However, the development brought about would have taken by normal cycles over 250 thousand years. Though we also have limitations, making it necessary to add years (?) to certain conditions that are difficult for you at this time to rationalize. Our intent and purpose toward you exceeds your most beautiful wishes and dreams for your existence. The inhabitants of your world have been repeatedly told of this and it has always been converted to spiritualistic ideals. It is an understandable thought process to attempt to understand the unknown by measuring it with the known. We do not condemn for this. To those of you who will follow certain steps we may be able to help you a great deal, to reach higher understanding. Thereby improving your own conditions of survival on your world. At the same time, assist as in our endeavors.

The man whose body and mind I am using to speak to you is being used by his own full cooperation. Had he not reached out I would not have been beamed to him in answer. Yet all who reach however are not answered, for all do not reach out in honesty of purpose. Some wish to acquire for some personal gratification of the moment and therefore do not reach a point of opening the systems necessary to receive me. I am beamed to many on your world. This man is not spectacular therefore. We are using many methods at this time to inform your people of our presence, our immediate purposes. The time is quite near for cooperation between us to begin. Your next step upward will soon begin. Full knowledge of our presence will soon be known among your people. There will be

at that time a great upheaval on your planet. We regret this cannot in any way be avoided. We knew this from the beginning. We therefore have repeatedly warned to prepare for it mentally and physically. Those who take not the trouble to prepare are of little value to themselves in any case. We can in no way tell you the day or the minute this upheaval will begin to take on climactic proportions. You must watch and prepare yourselves according to the conditions you observe. We will guide those of you who sincerely allow us to. We do not intend any evacuation of your planet on any scale. You are no use to us in the outer reaches. Our craft are now adequately manned. Our need of your cooperation involves habitation of your world, by your people, under more suitable conditions than you now realize. However following the climatic upheaval on your world, we will provide guidance to bring about the desired conditions for your and our mutual benefit. Seek us and you will find us. We only await your call. Peace be with you. I am Ishcomar.
