

Good evening, my friends, this is Roy.

I would like to talk to you for a little while, before the energy goes completely down. As you know all of you have been selected to do a certain amount of work, while you are on your own earth plane. But, within your own timetable, you will see many changes coming. Many changes are in the works all around the world today. In all the nations, in all the lands, many things are happening that even the scientists cannot figure out. They do not even know the answers to what is happening. If only they could attune to the higher side of life, they would get all of the answers.

You people are very fortunate, for you are a nucleus of the information and the knowledge that is now coming to the surface. Please do not allow any one to discourage or change your thinking. For it is through small groups, like yourself, that we are bringing the knowledge and information to all mankind. For you are all a beacon shining in a dark and ignorant world. As the old book said there will be many sights and wonders before the end of time. Changes the word time to era and you will have it right. Many things are changing at this time. And more changes will come about.

Another planets will be coming into your solar system. You will be visited by beings from another planet.

And you will realize that when you leave the earth plane and pass through the change of death, that you will be free to visit these other places. And you will achieve a great deal. Many of the leaders of your world will realize that there is no death. It is a matter of casting aside the physical body and going on. So you have a lot to live for and a lot to achieve. Keep going, hold your head high, ask and you shall receive. We are here; we await your call.

With God's grace and blessings I leave you and good night.
